volume-weighted potential around a halo (linear, z = 0)
$\xi_{\phi m}(r)$ [10^5 (km/s)^2 per unit bias]
r [Mpc/h]
infinite
L = 200 Mpc/h
L = 500 Mpc/h
L = 1000 Mpc/h
L = 2000 Mpc/h
solid: profile $\xi_{\phi m}(r)$; dashed: halo-pair difference $\xi_{\phi m}(0) - \xi_{\phi m}(r)$
box / infinite
r [Mpc/h]
profile, L = 200 Mpc/h
profile, L = 500 Mpc/h
profile, L = 1000 Mpc/h
profile, L = 2000 Mpc/h
rms potential difference between two points, $\sigma_{\Delta\phi}(r)$
box / infinite
r [Mpc/h]
